## SKILLS

|                  |                                                                                                                          |
|------------------|--------------------------------------------------------------------------------------------------------------------------|
| Programming      | • Python, C++, Matlab, JavaScript                                                                                        |
| Machine Learning | • Experienced with <b>deep learning</b> , <b>large margin methods</b> , <b>clustering</b> , and <b>anomaly detection</b> |
| Computer Vision  | • Experienced with <b>image &amp; video understanding</b> , <b>object detection</b> , and <b>semantic segmentation</b>   |
| Cloud Security   | • Experienced with <b>log analysis</b> , and <b>health monitoring</b>                                                    |

## EDUCATION

|                     |                                                                          |      |
|---------------------|--------------------------------------------------------------------------|------|
| Ph.D.               | • <b>Computer Science</b> , Simon Fraser University, Burnaby, BC, Canada | 2015 |
| Master of Science   | • <b>Computer Science</b> , Shandong University, Jinan, China            | 2010 |
| Bachelor of Science | • <b>Computer Science</b> , Shandong University, Jinan, China            | 2007 |

## TECHNICAL WORK EXPERIENCE

|                      |                                                                                                              |                    |
|----------------------|--------------------------------------------------------------------------------------------------------------|--------------------|
| Research Scientist   | Facebook, Seattle, USA                                                                                       | Jun 2018-Present   |
| Principle Researcher | Oracle Labs, Vancouver, Canada                                                                               | Dec 2015-Apr 2018  |
|                      | • <b>Deep learning for cloud security</b> : log analysis and health monitoring for Oracle Public Cloud (OPC) |                    |
| Intern               | SAP, Vancouver, Canada                                                                                       | Sept 2014-May 2015 |
|                      | • <b>Interactive graph visualization</b> : implement with JavaScript, jQuery, d3, SVG, etc.                  |                    |
| Intern               | Disney Research, Pittsburgh, PA, USA                                                                         | Sept-Dec 2013      |
|                      | • <b>Scenery part discovery</b> : implemented MCF solver in C++ to speed up clustering by 100 times          |                    |

## RESEARCH EXPERIENCE

|                    |                                                                                                             |                   |
|--------------------|-------------------------------------------------------------------------------------------------------------|-------------------|
| Research Assistant | Dr. Greg Mori, Simon Fraser University, Burnaby, BC, Canada                                                 | Jan 2011-Nov 2015 |
|                    | • <b>Structured inference neural networks</b> : jointly recognize image labels at multiple concept layers   |                   |
|                    | • <b>Neural time machine</b> : predict when, where and what is the next activity in sport videos            |                   |
|                    | • <b>Max-margin clustering</b> : extend with latent variables and hierarchical structures                   |                   |
|                    | • <b>Semantic segmentation</b> : leverage global object information for local pixel labelings               |                   |
|                    | • <b>Scene understanding</b> : recognize scenes from a collection of objects and surfaces                   |                   |
|                    | • <b>Video event analysis</b> : discover events in YouTube videos; recognize falling in nursing home videos |                   |
| Visiting Student   | Dr. Kai Ming Ting, Monash University, Churchill, Vic, Australia                                             | Aug 2009-Feb 2010 |
|                    | • <b>Mass estimation</b> : design and apply it for outlier detection, information retrieval and regression  |                   |
| Visiting Student   | Dr. Zhi-Hua Zhou, Nanjing University, Nanjing, Jiangsu, China                                               | Aug 2008-Jan 2009 |
|                    | • <b>Content-based image retrieval</b> : distance metric learning for relevance feedback                    |                   |

## OTHER EXPERIENCE

|                    |                                                                                                      |
|--------------------|------------------------------------------------------------------------------------------------------|
| Teaching Assistant | Simon Fraser University, Burnaby, BC, Canada                                                         |
|                    | • Taught <b>Machine Learning</b> (Fall 2011) and <b>Data Structures and Algorithms</b> (Spring 2011) |
| Reviewer           | • Conferences: <b>IJCAI</b> (2013), <b>NIPS</b> (2014,2015,2017), <b>CVPR</b> (2018)                 |
|                    | • Journals: <b>TKDD</b> (2013), <b>CVIU</b> (2014), <b>TPAMI</b> (2014, 2016, 2017)                  |
| Web Master         | • <b>ACM SIGKDD Conference 2012</b> (kdd2012.sigkdd.org)                                             |
